

TAIWAN SANYO PIR MOTION SENSOR LED LIGHT BULB

三洋感應式LED燈泡 SLD-P08W

三洋感應式LED燈泡 SLD-P08Y

Features

- Use high standard, high quality NICHIA LED chips
- Low power consumption, save up to 80% of electricity
- Smart Multi-sensing technology (motion/light/heat)
- Auto turn on-off inferred motion detect (Light turns on for 2 minutes when motion is detected within 6 meter.)
- Standard E27 Cap, easy to install
- Long life time
- Daylight Override Sensor - Only activates when there is not enough natural light present (150lux)
- Great for corridor, bathroom, elevator, penthouse, warehouse, garage, storage, kitchen, parking lot, basement, hallway, etc.
- Meet FCC and CE standard-wide voltage range 100-240VAC

Instruction

Initial Set Up: After switch on the power for the first time, the light will turn on for 2 minutes then switch to standby mode.

Standby Mode: Only activates when there is not enough natural light present (150lux).

Auto Turn On: When motion is detected within a 6 meter range across a detection angle of 120 degrees.

Auto Turn off: When motion is not detected within the area, light will turn off in 2 minutes.

Product Information

Product of : Taiwan

Size : Diameter 60mm* Height 116mm

Voltage : 100-240V , 50/60Hz

Power : 8W

CRI : Ra>70(Bright White) Ra>80(Warm White)

Luminous Efficiency : 65lm/W(BW) 60lm/W(WW)

Color Temperature : 5,700K (BW) 3000K (WW)

LED : 40,000Hrs

Sensing Area : 6 meter range across a detection angle of 120 degrees in 3 meter height

Cap Type : E27

Working Temperature : -20°C ~ 40°C

Sensor : Passive Inferred

Luminous Flux : 520lm(BW) 485lm(WW)

Attention

- Do not use in a close fixture.
- Not a waterproof product, indoor use only.
- Do not touch the light directly with your hand after hours of working.
- Do not install near at any heater or other hot products.
