

LED Tube T8 Series-----18W 4ft Motion Sensor LED Tube Lights

Key Features

- Motion sensor LED tube oval-shape design
- Adopting SMD LED2835 as light source
- Isolated power supply C.C. LED driver
- 10meter distance remote sensitivity available
- 1-2 hours lighting lasting endurance
- Application in underground park lots, warehouse, basement,etc.
- Working under high humidity circumstances

Descriptions

Motion Sensor LED Tube Operation Principle:

- When no object attending or human approaching, motion sensor LED tube lights keep 30% luminaire for power saving mode.
- While object attending or human approaching, motion sensor LED tube will automatically switch into 100% lighting mode. Luminaire duration shall last 1-2 hours.
